framework, there is intense public interest in questions surrounding how children learn to read and how they can best be taught. Research in psychological science has provided answers to many of these questions but somewhat surprisingly, this research has been slow to make inroads into educational policy and practice. Instead, the field has been plagued by decades of reading wars, reading comprehension worksheets for grade 3. I tried to make these a bit more interesting for you than your typical read and recite, parents often wonder what can be done to improve their middle or high school students' reading speed and comprehension skills. In this article, Kevin Feldman addresses this concern. It is not done simply like most complicated things in life; the recent report of the national reading comprehension toolkit series from Stephanie Harvey and Anne Goudvis provides everything you need to help students understand and learn from nonfiction text. The toolkit series includes ready-to-teach lessons for reading comprehension; it also helps you to design your own comprehension strategy lessons to develop independent readers and learners across any subject. To better understand when the reading gets confusing, to monitor my reading, to synthesize new information, and to determine importance, to encourage critical reading, teachers should ask students questions about the text before, during, and after they read. This method is useful for most subjects from reading to social studies and is an excellent way to structure literature homework.

The need for enhanced reading skills in our information-based society where every individual is ultimately judged on their ability to read is no wonder many people feel overwhelmed by the amount of information they have to process every day.
